

# Chalking and Posting

DO NOT chalk on the walls of buildings (or any vertical surface) or in an area covered by an overhang or that cannot reasonably be expected to be reached by rain. Chalking is not permitted on building surfaces, furniture, public works of art (such as the Gift located in the Plaza between the student union buildings), and within 10 feet of building entrances, or if it poses a safety threat/risk. The use of chalk must not violate the Department of Environmental Health and Safety standards regarding chalk found on their [website](#).

DO NOT tape or affix anything to any exterior surface, including sidewalks. For interior spaces, each facility has its own regulations regarding the posting of fliers, so you should check with each facility before doing so.

**Doing either one of these violates University policy and you are subject to the costs of cleaning.**
